EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science and Engineering (CGPA: 7.67)

Bhopal, Madhya Pradesh

Oct 2022 – Jun 2026

Meerut Public School

Class XII (85%) Class X (87%)

Meerut, Uttar Pradesh

Mar 2020 – Jul 2022

TECHNICAL SKILLS

- **Languages:** Python, SQL (MySQL, Joins, Subqueries, CTEs, Window Functions), HTML, CSS
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Streamlit
- **BI & Databases:** Power BI, DAX, Data Modeling, Star Schema, MySQL, Advanced Excel (Pivot Tables, VLOOKUP, XLOOKUP)
- **Data Analytics:** Data Cleaning, EDA, Data Visualization, KPI Analysis, Dashboard Development, ETL
- **Tools & Others:** Jupyter Notebook, GitHub, LLM Application Development, Prompt Engineering, Generative AI Integration, Groq API

PROJECTS

Customer Shopping Behavior Analysis | [Python](#) · [MySQL](#) · [Power BI](#) · [Streamlit](#) · [Groq API](#) | [GitHub](#)

- Analyzed **3,900 customer records** using Python (Pandas, Seaborn), identifying Young Adults as the highest revenue segment (**\$62,143**) and Fall as the top-performing season (**\$60,018** in total sales).
- Executed **10 structured SQL queries** in MySQL for customer segmentation (3,116 Loyal, 701 Returning, 83 New), discount impact analysis, and revenue breakdown by gender, age group, and product category.
- Designed a **Power BI dashboard** with 12 KPI cards, drill-through filters, and category-level visuals to track spending patterns across 4 product categories for business reporting.
- Deployed an **AI-powered chatbot** using Streamlit and Groq API (LLaMA 3.3 70B) with context injection via system prompts, enabling non-technical stakeholders to extract dataset insights without SQL knowledge; integrated directly inside the Power BI dashboard for seamless stakeholder access.

Meta Ad Performance Dashboard | [Power BI](#) · [DAX](#) · [Star Schema](#) · [KPI Analysis](#) | [GitHub](#)

- Developed a dual-platform Power BI dashboard tracking Meta (Facebook & Instagram) ad campaigns across the full marketing funnel — **216K impressions**, **25.4K clicks**, CTR of **11.76%** (9x the industry average of 1–2%).
- Engineered a **star schema data model** (ad_events as fact table; ads, campaigns, users as dimensions) and computed **10 KPIs using DAX** including CTR, Conversion Rate (5.21%), Engagement Rate, and Purchase Rate.
- Developed **7 visualizations** (donut chart, world map, calendar heat map, stacked bar, hourly area chart) with a measure slicer, revealing peak engagement at 15–20 hrs and Video as the top ad format (CTR 11.9%).
- Identified key audience segments: females aged 18–30 accounted for **43% of total engagements**; India and Brazil led in volume while Germany and UK showed stronger purchase conversion rates.

CERTIFICATIONS & ACHIEVEMENTS

- **Data Analytics Job Simulation** [\[link\]](#) — Deloitte Mar 2025 – Mar 2025
Simulated a client analytics engagement by cleaning and analyzing 3 business datasets, extracting KPIs, and presenting findings to support strategic decision-making.
- **Winter Internship Technical Training** [\[link\]](#) — India Space Lab (ISL) Dec 2024 – Jan 2025
Completed Space Science and Technology training; modeled CanSat subsystem power consumption and optimized power distribution, achieving a **20% increase in battery life**.
- **Fundraising Intern** [\[link\]](#) — NayePankh Foundation (UP Govt. Registered NGO, 80G & 12A) Mar 2023 – Apr 2023
Executed fundraising campaigns for an underprivileged upliftment NGO; managed donor outreach and stakeholder communication across a 1-month remote program.
- **HTML, CSS & JavaScript for Web Developers** [\[link\]](#) — Johns Hopkins University / Coursera Dec 2023 – Feb 2024
Built responsive web pages using HTML, CSS, and JavaScript; implemented layout design, styling, and interactive UI functionality.
